

If you would like to:

- Learn through hands-on experience
- Work in a fast-paced medical environment
- Study biology and physics
- Show your inherent empathy with patients
- Develop strong communication skills as part of a team
- Take responsibility, be autonomous and show initiative

Ultrasound technologists are in high demand because their work is essential for diagnosing patients and developing treatment plans. They perform ultrasound examinations and acquire images, videos and information, which they communicate to a specialized physician. As part of an interdisciplinary team, they assist in medical interventional procedures. Seeing a developing fetus for the first time is an exciting part of the job in the obstetrics specialty. Other subsectors include cardiac and abdominal ultrasonography. At Dawson, Medical Ultrasound Technology students will enjoy hands-on learning in a stimulating environment, including state-of-the-art equipment, with a small group and one-on-one support from teachers. This is a brand new program at Dawson that will be offered for the first time in English in Quebec in the Fall of 2021.
